

MODIFYING EXISTING PRODUCT FOR USE WITH 12MM LAMINATE

EXISTING FLOORING ACCESSORIES CAN BE USED WITH 12MM FLOORING IF FITTED WITH D-SECTION (MOD0717)

D-SECTION MUST BE CUT TO SIZE AND THE FITTING TRACK ATTACHED. IF USING SCREWS, PILOT HOLES MUST BE DRILLED INTO THE D-SECTION AT THE LOCATIONS REQUIRED ALONG THE FITTING TRACK.

APPROPRIATE FITTINGS MUST BE USED FOR THE INTENDED SUBFLOOR. IF USING SCREWS THEY MUST BE LONG ENOUGH TO SCREW THE TRACK AND D-SECTION INTO THE FLOOR AT THE SAME TIME.

THIS SOLUTION WILL ALLOW THE USE OF EXISTING PRODUCT WITH 12MM FLOORING FITTED WITH UNDERLAY OF 2MM (SDH0900), 3MM (SDH0915), AND 5MM (SDH0909) THICKNESS.
