Perfect results with the Food Sensor

Thanks to the Food Sensor of this oven you can measure the core temperature from the center of your dish during the cooking process. So you get the perfect results everytime.

A self-cleaning oven

With one touch of the Pyrolytic cleaning function, dirt, grease and food residue in the oven is converted into ash that you can easily wipe off with a damp cloth.

Effortless control. EXPLORE LED Display with Touch buttons

Explore a new way to experience your oven with the responsive EXPLORE LED Display with touch buttons. The vibrant interface gives you quick access and dynamic control of cooking time, temperature, and other features.

Cooked Evenly everywhere

With this oven, using energy efficiently also means cooking efficiently. It has a new convection system called Hot Air, which ensures hot air circulates evenly throughout the oven cavity. The result is that the oven heats up faster and cooking temperatures can be reduced by up to 20%, saving you both time and energy
