

LAM6700 and HJA6750 installation amendments

Removal of the tall feet and the door on door brackets

Please see below the fitting amendments for the following appliances:

- LAM6700 - Lamona integrated full-height larder fridge
- HJA6750 - Lamona integrated full-height frost free freezer

Extra tall feet

Both these products fit without the need for the additional tall feet, as stated in the installation manuals. This will still achieve the required gap underneath the appliance for air recirculation.

Door on door brackets

The recommended door fitting for both these products is by slider mechanism, as opposed to the door on door method suggested in the installation manuals.

Both the instruction manuals will be updated to reflect these changes.

Future products will also have the tall feet and the door on door brackets removed.
