

PLU3000 FLEXIBLE PLUMBING KIT FOR SINGLE BOWL SINKS

Assembly Notes:

It is important that the sliprings are fitted between the compression nuts and the conical washers as this will prevent distortion during tightening and prevent leaks.

Care should be taken not to over tighten the compression nuts.

Connecting pipe 'X' may be cut to length, it is important that any rough edges are removed from the end of the pipe by light sanding.

Connection Information:

Only suitable for single bowl sinks.

Flexible hose measurements; 230mm (closed) – 750mm (open)

The waste trap conforms to BS3943.
