

# SNK1010 Fitting into a Cabinet

## SNK1010 – 1.5 Ceramic Sink

600 Cabinet Fitting shown in images but the sink will fit in 600mm cab +  
Fit sink centrally to the worktop (front to back)

### Right Hand Drainer

When the sink is mounted with a RH drainer in a 40mm worktop a cut-out of 310 x 130mm (L x H) is required in the left side of the back panel of the cabinet; the height will be increased up to 150mm for a 20mm worktop

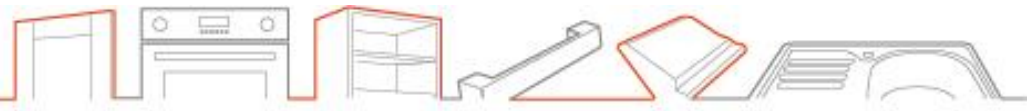

### Left hand Drainer

For a left hand drainer a min of 15mm off the whole back rail of the cabinet is required to be removed when using a 40mm worktop, this will increase to 35mm for a 20mm worktop

# SNK1011 Fitting into a Cabinet

## SNK1011 – 1.0 Ceramic Sink

600 Cabinet Fitting shown in images but the sink will fit in  
600mm cab +  
Fit sink centrally to the worktop (front to back)

### Left Hand Drainer

When the sink is mounted with a LH drainer in a 40mm worktop a cut-out of 500 x 130mm (L x H) is required in the back panel of the cabinet; the height will be increased up to 150mm for a 20mm worktop  
Builder may want to put a support rail in the back of the cabinet as shown in images

### Right hand Drainer

For a right hand drainer a min of 15mm off the whole back rail of the cabinet is required to be removed when using a 40mm worktop, this will increase to 35mm for a 20mm worktop
