

NEW PRODUCT

WK50 launch of Quickstep Engineered Caramel Oak Herringbone flooring (SDH2895).

PROCESS

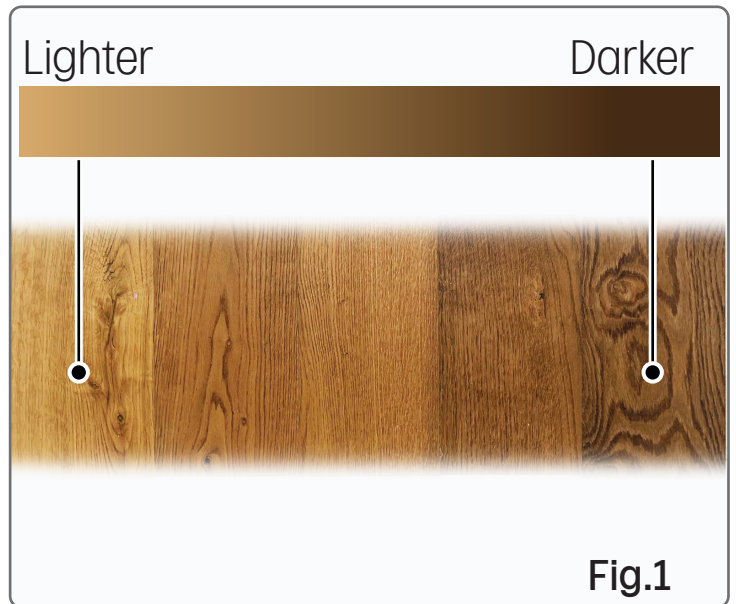

The wood goes through a "fuming" process with ammonia to bring out its natural colour and tannins. The product is not stained or lacquered.

DESIGN

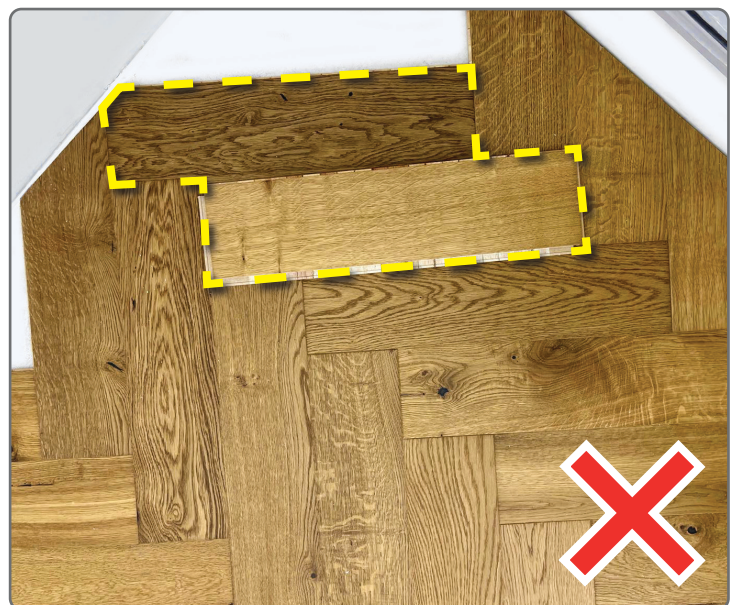

This flooring is designed to have a wide natural variance of colour tones. See Fig.1 for colour spectrum.

MIX IT UP

Before installing: Mix the planks from different boxes to avoid colour patches. This will result in a more balanced overall look.
