

Richard Burbidge Elements®

- Simple and quick to install
- Pre drilled and cut components
- Innovative twist bracket to easily fix the rails to newels
- Suitable for stairs with pitches of 40-43 degrees
- FSC® certified and sustainably sourced timber

Components required

Balusters

To work out how many balusters you need, divide the staircase handrail length (mm) by 125, usually 9 packs of 3 are required for a typical 12 tread staircase. For landings, divide the handrail length (mm) by 90

Fixings kits

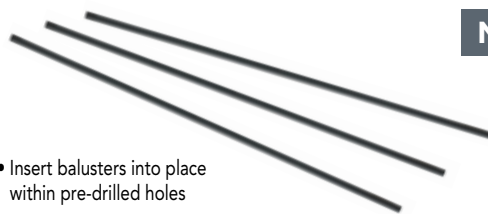

Each kit contains 2 handrail fixings. One pack for landing and one for rake

Hand & baserails

Pre drilled for balusters to slot into and fix with a proprietary wall board adhesive
