

## Oak Veneered Skirting, Architrave and Linings

**Please note; for all Oak Veneered Skirting, Architrave and Linings, please make the following recommendations for the finishing, storage and fitting of these products.**

### Finishing

- A PU, Acrylic or water based varnish is recommended to finished the veneered profiles as they offer moisture resistance – GAR0539 Sadolin Interior Varnish is a PU based product so is suitable.
- We recommended customers testing the finish on a small section of moulding before finishing the length.
- Oils should not be used.

### Storage

- Profiles should be stored in a dry area with any exposure to damp conditions avoided.

### Fitting

- Profiles should not be installed in freshly plastered rooms.
