

Fitting Instructions for Eclipse Spring Hinges

Size	Hinge Type	SSS	PSS	EB
102x76x3mm	Square Corner	14922	14923	14924
102x102x3mm	Square Corner	14890	14891	14901
102x102x3mm	Radius Corner	14913	14914	14915

Fit the hinges to the door and frame with the Allen Key Hole facing upwards towards the ceiling, in both clockwise and anti-clockwise closing door applications.

(as pictured left)

Place the Allen Key into the hexagonal hole in the top of the hinge, press down while turning the key in a clockwise direction to set the spring hinges tension to the desired level.

(as pictured right)

Once the hinge has been sufficiently tightened to the desired strength push the fixing screw into the side of the hinge into one of the four holes in the hinge pin to hold the spring hinge at the set tension, and tighten it until the screw head is flush with the hinge knuckle.

(as pictured left)
