

Please refer to the following pages of this document for list of products for which the instructions apply

• ***Instructions for fixing Ironmongery***

All spindles provided can be cut to size to fit any thickness of door.

When fixing the ironmongery to soft wood or hard wood it is always necessary to pre-drill the holes for the screws. This will give a cleaner and more solid fixing to the door and will stop the screws from breaking. We also recommend using a manual screwdriver to fix each screw to the door. This reduces any screw heads snapping and the plate being too tight to the door.

• ***Instructions for cleaning Ironmongery***

- Brass products / Satin Nickel products.

Our products are protected by the most advanced lacquer available and under normal circumstances should give many years of service. They should be cleaned with a cloth moistened with soapy water or alternatively wiped over with a soft cloth with beeswax. **UNDER NO CIRCUMSANCES USE ANY FORM OF METAL CLEANER, OR AEROSOL SPRAYS.**

However, after a period of time the lacquer coating, especially on external fittings, can suffer possible breakdown. Therefore, the life of the lacquer is beyond the manufacturers control and cannot be guaranteed. When the lacquer coating has broken down, remove the brass fittings and coat using a soft brush with acetone thinner e.g. "Nitramores". Completely dry the product using a soft cloth and metal polish, such as "Brasso" or "Duraglit". At this stage the product can be polished as and when required using "Brasso" or "Duraglit".

- Chrome products.

Our quality chrome products are virtually maintenance free. However, deposits will accumulate on external fittings. We therefore recommend regular cleaning with a soft cloth and non-abrasive wax polish.

This will ensure the original appearance is maintained.

List of Ironmongery corresponding to the above instructions

Victorian Scroll Brass
